Company
Fortune 1000 Medical Device
& Instrumentation Company

Industry
Life Sciences

Country
USA/Malaysia

Solution
Migration from Stellent
(Oracle) to SharePoint

Technologies
Stellent (Oracle) ECM, MOSS
2007, Easy2Share

Background

Our customer, a maker of scientific testing equipment, supplies a slew of bioanalytical and electronic measurement tools, including data generators, multimeters, and oscilloscopes. Operations straddle electronic test and measurement instruments (the largest in the world), bio-analytical measurement, and a semiconductor and board test business. The company offers centralized lab research, too. They have more than 25,000 customers worldwide.

The Customer had the following content migration requirements:

- Migration of complete Stellent (Oracle) environment to MOSS 2007.
- Verinon provided a hybrid services & migration tool approach to this engagement.
- All of the client's vanilla and customized content had to be migrated into the expectant SharePoint environment per customer's requirements.

The Challenge

As one of the largest makers of scientific equipment – standardized on a single platform for collaboration was of paramount importance. With an outdated existing collaboration platform in place, an executive decision was made to retire this system and move to Microsoft SharePoint 2007 as the corporate standard. The challenge centered around creating a migration service/solution that would be able to accommodate moving their highly customized data structures. Verinon engaged with this customer providing both services that complimented the customer's existing team, as well provided robust migration tools and reporting to simplify the process. This migration also needed to account for multiple sites dispersed around the globe and offer a 24/7 migration approach.

Solution

- Easy2Share for Stellent
- Verinon's Turnkey Services Approach

To meet these objectives Verinon engaged its global migration services team to accomplish this turnkey migration project.

By deploying our services methodology and using Verinon's Easy2Share migration tool for Stellent (Oracle), Verinon's delivery team was able to complete the migration on time and within the budgetary needs of the client.

Verinon's proprietary content migration products/methodology is in place at numerous companies across many vertical industries within North America and Asian Pacific Regions. Our methodology is proven and offers a guaranteed business result.

Result

Verinon's Easy2Share Stellent to SharePoint migration product migrated all of the customer's content to SharePoint with pinpoint accuracy. The product has received very positive feedback after several months of the system's utilization.

Among the most important business benefits noted by the Customer are:

- Complimented Client's existing team with resources and migration tool allowing for seamless migration of Stellent content.
- Accommodated customers need to migrate customized content/metadata.
- Modification of the migration tool on the fly to accommodate customer's unique needs.
- Migration of nearly 3Terabytes of data into a customized SharePoint 2007 environment.

About Verinon

Verinon Technology Solutions is a CMMi Level 3 and ISO-9001 Certified IT Services Company specialized in system integration services around Document and Content Management, Collaboration, Business Intelligence, Data warehousing, Conversions and Interfaces/adapters coupled with a select pool of custom development areas to clients around the globe.

Verinon is a Gold Certified Partner since 2008. Our SharePoint practice consists of 50+ full time consultants serving our esteemed clients at every corner of the world providing Enterprise Content Management and portal solutions to our customers across world.

Easy2Share

Verinon's Easy2Share SharePoint migration tool simplifies the process eRoom migration to SharePoint, Documentum migration to SharePoint, Lotus migration to SharePoint, Stellent migration to SharePoint. Our SharePoint migration services team helps to analyze your existing data structure and suggests you a planned approach to opt for migration, which helps in mitigating the risk involved in complex migrations.

The Easy2Share Advantage

- Detailed reporting and audit logs to facilitate an easy process of auditing
- Takes into account issues of maintaining meta data, security, permissions, ownership information, access rights in recreating the same environment within Microsoft SharePoint
- Product methodology that takes into consideration:
- Leverage SharePoint's power: SharePoint provides incremental features such as expanded meta data that can be populated as part of the migration process
- Control Change Management: The process includes a customized look and feel and structure to minimize user confusion
- Migrate at own pace: Most such migrations can't be done as a onetime event where support is built to facilitate an easy-as-you-go approach
