**Company**  
Research, development and manufacturing company based in California

**Industry**  
Manufacturing

**Country**  
USA

**Solution**  
Migration from SharePoint 2010 to SharePoint 0365

**Technologies**  
SharePoint 2007, 2010 ,  
SharePoint 0365

## Background

Our customer is a leading American public research, development and manufacturing company. For more than 15 years, the company has provided analytical instruments, software, services and consumables for the entire laboratory workflow.

The Customer had the following content migration requirements:

- Migration of SharePoint 2010 to SharePoint O365
- Re-building/development of SharePoint 2007 custom applications to SharePoint O365
- Content and development needed to be completed within 9 months.

## The Challenge

As one of the largest public research, development and manufacturing companies in the world. A major challenge was ensuring that internal and external collaboration became standardized on a single platform. In this case, the company determined that Microsoft SharePoint O365 was the desired platform moving forward. Because SharePoint 2010 was the existing the platform in use for a long period of time. There was widespread usage/adoption by their user community. The challenge was re-building their existing SP 2007/2010 custom applications and applying this into the new SharePoint O365 platform. There was a strong need to seamlessly transition SharePoint 2007/2010 users and their content over to an existing SharePoint O365 environment. This transition needed to happen swiftly and with as minimal an impact as possible, so proper change management was key.

## Solution

To meet these objectives Verinon engaged its global migration services team to accomplish this turnkey migration project.

The Verinon team deployed our services methodology by using our Easy2Share migration approach, as well as using the ShareGate migration tool. Verinon's delivery team was able to complete the migration on time and within the budgetary needs of the client.

Verinon's migration services methodology consists of 1) Analysis of the customers SharePoint 2010 environment through robust reporting. 2) Planning for issues relating of user permissions and platform differences requiring change management and possible customizations. 3) Migration of all source sites through the migration tool into production SharePoint O365 site collections. 4) Validation by the Verinon services team assuring the content was accurate and migrated per customer requirements. 5) Handover of the newly migrated content to the business owners/users.

The Verinon development team rebuilt all the SharePoint 2007 custom applications into the new platform using SP Client API framework and deployed all new custom applications into the Azure platform.

Verinon's proprietary content migration methodology is in place at numerous organizations across many vertical industries within North America and Asian Pacific Regions. Our methodology is proven and offers a guaranteed business result.

## Result

The Verinon team successfully migrated all source site collections to SharePoint O365, as well as re-developed each custom application and ported them onto the O365 platform. To date, the system has been successfully running without issue. Usership of the O365 platform has expanded as a result and our client is seeing steady productivity gains.

### Among the most important business benefits noted by the Customer are:

- Vastly reduced the amount of time necessary to migrate content
- Allowed for the customer to focus on critical tasks instead of the migration
- Modification of the migration approach on the fly to accommodate customer's unique needs
- Migration of several terabytes of content and over 600 Content databases with 100% accuracy

### Customer Quote:

"Verinon has been a long-time, trusted partner in our endeavor to leverage SharePoint Online and OneDrive as our primary systems for content management and collaboration. The focus on the Microsoft 365 ecosystem helped us achieve substantial cost savings and increased collaboration across the company. Reliable, fair, and committed to quality, Verinon played a vital role, especially in data migrations from other systems. Verinon will continue to be a go-to partner as we now also bring Teams and the Power Platform into our adoption focus."

– Luke Merrill, Director Collaboration Services, Agilent Technologies

## About Verinon

### About Verinon

Verinon Technology Solutions is a CMMi Level 3 and ISO-9001 Certified IT Services Company specialized in system integration services around Document and Content Management, Collaboration, Business Intelligence, Data warehousing, Conversions and Interfaces/adapters coupled with a select pool of custom development areas to clients around the globe.

Verinon is a Gold Certified Partner since 2008. Our SharePoint practice consists of 50+ full time consultants serving our esteemed clients at every corner of the world providing Enterprise Content Management and portal solutions to our customers across world.

### Easy2Share

Verinon's Easy2Share SharePoint migration tool simplifies the process of migration content from sources like: eRoom, Documentum, Jive, Oracle Stellent, ApplicationXtender, Docushare, Lotus Notes, LiveLink and others to Office365. In addition our Easy2Share migration process allows for seamless migration from On-premise SharePoint 2007/2010/2013/2016 to Office365. Our SharePoint migration services team helps to analyze your existing data structure and suggests a methodical/planned approach to migration. Our methodology helps in mitigating the risks involved in complex migrations, as well as offers a guaranteed business result.

### The Easy2Share Advantage

- Detailed reporting and audit logs to facilitate an easy process of auditing
- Takes into account issues of maintaining meta data, security, permissions, ownership information, access rights in recreating the same environment within Microsoft SharePoint
- Product methodology that takes into consideration:
- Leverage SharePoint's power: SharePoint provides incremental features such as expanded meta data that can be populated as part of the migration process
- Control Change Management: The process includes a customized look and feel and structure to minimize user confusion
- Migrate at own pace: Most such migrations can't be done as a onetime event where support is built to facilitate an easy-as-you-go approach
